

# EPT

## Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

## PHENOM →D AZ-DEFENCE

AZ-Defense is an adjuvant that strengthens the animal's defenses by improving their performance, its formula is based on natural bentonites enhanced through EPT technology.

### DESTINATION

Adjuvant for all types of animals

### FEATURES

AZ Defense is composed of a mixture of particular natural and high quality clays. It contributes to the increase and recovery of the animal's natural defenses. In addition to improving the assimilation of nutrients and appetite, it also improves health and consequently the behavior of the animal. AZ Defense reduces the need to resort to chemicals and during periods of drought it is not necessary to use urea. It regulates rumen activity and also the production (better conversion) by correcting nutritional imbalances. The products derived from the animal treated with AZ Defense have a greater resistance to deterioration.

### RECOMMENDED PROTOCOL

It can be easily mixed with feed. Administer depending on the type of animal and its development phase, from 5 to 15 grams per day.

### COMPOSITION

Natural bentonites enhanced with EPT technology.

### PRODUCT FEATURES

Consistency: Light gray fine powder  
Odor: Characteristic  
Packaging: 5-10 Kg. And Big-Bag 600 Kg  
Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

### ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
