

# EPT

## Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

**PHENOM**  
**T-PURE** WATER

*T-Pure Water is a sanitizer with bacteriostatic properties. Its natural characteristics are enhanced through EPT technology.*

### DESTINATION

Drinking water, Cisterns, pipes.

### FEATURES

T-PureWater is a bacteriostatic, deep-acting sanitizer. Its formula is based on citric acid boosted through EPT technology. T-Pure Water reduces chlorine and improves the organoleptic qualities of all waters. Suitable for making drinking water safe.

### RECOMMENDED PROTOCOL

dosages and methods to be established based on use.

### COMPOSITION

Citric acid boosted with EPT technology.

### PRODUCT FEATURES

Consistency: Transparent liquid

Odor: Neutral

Packaging: 5-10 Kg /Big-Bag 600 Kg.

Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

### ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
