

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM
BR-METHOD

BR-Method is based on trace elements able to improve the quality of flour for the production of fermented products. Its natural characteristics are enhanced through EPT technology.

DESTINATION

Flour and fermented products

FEATURES

BR-Method is specifically developed for flours intended to fermented products.

Its formula, based on trace elements, has the ability to reinforce the flour's gluten, improving its quality. Br Method improves the taste of products, increases shelf life and reduces weight loss. BR-Method is compatible with any other additives used, it allows mixing with weaker flours, increasing their quality.

RECOMMENDED PROTOCOL

It can be added during processing together with the other ingredients or previously with flour. From 15 to 30 grams per 100Kg of flour.

COMPOSITION

Calcium-based trace elements enhanced with EPT technology

PRODUCT FEATURES

Consistency: White powder

Odor: Neutral

Packaging: 5-10 Kg. And Big-Bag 600 Kg.

Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
