

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM PROGRAM-EST

Program-EST is metabolism and spontaneous defenses seeds activator based on minerals, silicates and organic materials activated and enhanced with EPT technology

DESTINATION

Complete seed treatment

FEATURES

Activator of metabolism and spontaneous seed defenses, Program-EST is a pretreatment and treatment of seeds and seedlings through the EPT activation of silicates, minerals and natural phytotherapeutic principles, which develops excellent results in germination, vigor, color and growth. Seed growth occurs in the first days after sowing.

It is recommended to apply Program-EST with Nutra - S Flow

RECOMMENDED PROTOCOL

Treat the seeds with: 200 gr. of Program EST for 10 Kg. Of seeds. Treat the seedlings: 50-75 gr. of EST Program for 10 liters of water for 2-4 hours

COMPOSITION

Minerals, silicates and organic materials activated and enhanced with EPT technology

PRODUCT FEATURES

Consistency: Sliding clear powder

Odor: Characteristic

Packaging: 5-10 Kg/Big-Bag 600 Kg.

Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
