

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM GREENPOWER-HL

Green Power- HL is a fertility activator based on organic materials enhanced with EPT technology

DESTINATION

All types of crops and land

FEATURES

GreenPower-HL is a rich active organic matter compound that acts as a supplement to increase plants and soils fertility. It promotes plants, roots and fruits's growth, it stimulates growth's speed, it promotes delayed vegetative recovery, it recovers crops under stress and from herbicide burns. It promotes the natural formation of amino acids, favoring the formation of high biological value proteins, obtaining plants more resistant to adversity and higher quality products. It can be applied at all stages: from sowing, during growth, flowering and even with fruit ripening.

RECOMMENDED PROTOCOL

Spray the plants with aqueous solutions at 0.3 to 0.5%
Customized protocols are available upon request

COMPOSITION

Organic materials
enhanced with EPT technology.

PRODUCT FEATURES

Consistency: fluid brownish liquid
Odor: characteristic
Packaging: 1-5 liters/1000 Kg Big-Bag
Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
