

# EPT

## Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

**PHENOM**  
**EP5-PROTECT**

*EP5-Protect is a protector, inducer of resistance and metabolism activator based on minerals and silicates activated and enhanced with EPT technology.*

### DESTINATION

All types of crops

### FEATURES

EP5-PROTECT is a universal treatment for crops subjected to stress caused by plant parasites. It energetically stimulates the plant's spontaneous defenses, it slows the growth of fungal mycoses, it catalyzes chlorophyll and it promotes the formation of auxins. EP5-PROTECT is composed of extremely active clays that create an unfavorable environment for the growth of fungal mycelia, acting in a preventive way. It catalyzes the formation of chlorophyll, strengthening the green of the plant and encourages the formation of auxins. It can be applied beforehand alone or with other fungicide products. It increases its effectiveness when used during flowering, and does not affect the biological development of plants.

### RECOMMENDED PROTOCOL

Spray the plants with aqueous solutions at 0.3 to 1.5%.

Customized protocols are available upon request.

### COMPOSIZIONE

Minerals and silicates enhanced with EPT technology.

### PRODUCT FEATURES

Consistency: Gray thin powder

Odor: Characteristic

Packaging: 5-10 Kg/Big-Bag 600 Kg.

Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

### ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
