

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM
ADSCOMPLEMENT

ADS Complement improves product applications by increasing their efficiency. Its formula is based on vegetable oils and co-formulants powered by EPT technology

DESTINATION

Complement for all products in the Phenom AGRO line

CARATTERISTICHE

ADS Complement is a high penetration index product, it has an excellent adhesion to vegetables and it is an excellent vehicle for transporting active ingredients. It is a complement to use in association with all the products of the Phenom Agro line. Through its use it allows to reduce the dosages of the products increasing their effectiveness.

RECOMMENDED PROTOCOL

Spray the plants with aqueous solutions at 0.03-0.05%

Application per hectare: 100-150 cc.

Customized protocols are available upon request

COMPOSITION

Vegetable oils and co-formulants powered by EPT technology.

PRODUCT FEATURES

Consistency: Fluid yellowish liquid

Odor: Pungent characteristic

Packaging: 1-5 liters/1000 Kg Big-Bag

Validity: 2 years

Our products leave no residue and respect crops, livestock and the environment
