

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM
TZ-CONTROL

TZ-Control is an antioxidant, acidifier with a broad-spectrum bacteriostatic effect based on natural bentonites, sodium sulfate and citric acid enhanced by EPT technology.

DESTINATION

Antioxidant, acidifier with a broad-spectrum bacteriostatic effect for all types of animals

FEATURES

TZ-Control increases the useful life of the feeds while preserving their organoleptic characteristics. It prevents rancidity and oxidation of the food fatty components improving nutrient absorption reducing the feed doses.

TZ-Control is a fungicide and allows to effectively control the effects of molds and yeasts, giving a better microbiological quality, thus increasing palatability. It increases animal welfare and gives a functional balance to their body.

*for maximum results use with Phenom AZ-Defense

RECOMMENDED PROTOCOL

It can be easily mixed with feed by mouth. 1.5 to 2kg per ton of feed

COMPOSITION

Natural bentonites, sodium sulfate and citric acid enhanced with EPT technology.

PRODUCT FEATURE

Consistency: Light gray fine powder
Odor: Characteristic
Packaging: 5-10 Kg. And Big-Bag 600 Kg
Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
