

# EPT

## Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

## PHENOM IMMUNO-TY10

Immuno TY10 stimulates the metabolic processes to increase plants's spontaneous defenses. Its formula is based on proteins and plant extracts enhanced with EPT technology

### DESTINATION

All types of crops

### FEATURES

IMMUNO-TY10 is a product based on a selection of proteins activated with EPT technology. IMMUNO-TY10 encourages the metabolic processes of plants to increase spontaneous defense by helping them to inhibit environmental and pathological stress. Particularly effective for crops affected by nematodes, crops with strong imbalances and subjected to pest stress.

### RECOMMENDED PROTOCOL

Spray the plants with aqueous solutions at 0.3 to 0.5%

Customized protocols are available upon request

### COMPOSITION

Proteins and plant extracts powered by EPT technology.

### PRODUCT FEATURES

Consistency: Fluid yellowish liquid

Odor: Pungent characteristic

Packaging: 1-5 liters/1000 Kg Big-Bag

Shelf life: 1 year

Our products leave no residue and respect crops, livestock and the environment

### ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
