

EPT

Energy Potential Technology

An innovative technological platform, able to maximize the active ingredients of natural substances and thus allow a biologically correct interaction with surprising results. EPT technology is a process that guarantee a natural, non-chemical and ecologically sustainable action as it is able to enhance existing substances in nature. It represents significant progress in the food, agricultural, livestock and industrial chemical industries, including the organic product segment and waste disposal. The use of EPT technology can replace the use of many chemical agents and toxic substances, guaranteeing safety and quality, increasing production and respecting the environments.

PHENOM
T-FORMULA

T-Formula is an acidifier with antioxidant and bacteriostatic properties. Its natural characteristics are enhanced through EPT technology.

DESTINATION

Fish / Milk and derivatives / Fruit and vegetables / Fruit juices
Beverages / Jams

FEATURES

T-Formula is the result of a long research on the formation mechanisms of carboxylic acids. In addition to being an extremely effective acidifier and antioxidant, it has marked bacteriostatic properties that give food a greater safety, improving its organoleptic characteristics and shelf life. The form of citric acid that we currently find on the market loses 400% of its potential during the production process. T-Formula, thanks to a sophisticated stabilization procedure, maintains the natural properties of citric acid without losing its natural potential. The surprising thing is that it also maintains the ability to improve the organoleptic properties of the products. T-Formula is not harmful to health and at the used concentrations does not leave extraneous residues in food.

RECOMMENDED PROTOCOL

From 20 to 150 grams per 100Kg of food

COMPOSITION

Citric acid boosted with EPT technology.

PRODUCT FEATURES

Consistency: White powder

Odor: Neutral

Packaging: 5-10 Kg. And Big-Bag 600 Kg.

Shelf life: 2 years

Our products leave no residue and respect crops, livestock and the environment

ABOUT

We are an Italian company which deals with innovative biotechnologies in agriculture, livestock, food and environment. We work closely with a team of scientists and researchers, whose work focuses on the development of biotechnologies capable of boosting a healthy and safe production, reduce energy consumption in full respect of the environment.
